

SET THE STAGE FOR A PERFECT EVENT

*Rapid Installment.
Ideal Surface Protection.
Engineered for Strength
and Performance.*

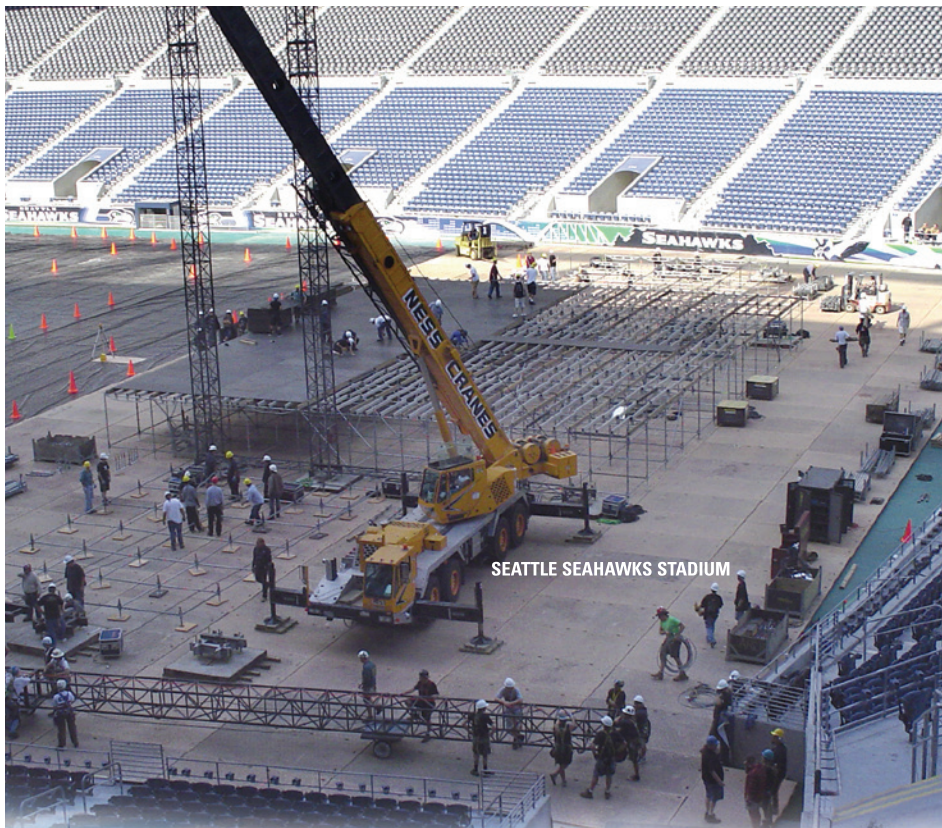

Arenas, stadiums and fairgrounds are ideal venues for outdoor events, but they require careful protection. DURA-BASE® not only protects the surface you need to work on, but provides vital access to locations that are too wet or sensitive for normal vehicle travel.

The interlocking DURA-BASE® system installs easily and rapidly, using a minimal crew and a fork-equipped loader. You'll never need to roll over the protected field because the mats can be set in place while operating on top of previously laid mats. Once the mats are locked into place with convenient fasteners, a continuous pad or roadway is created.

Scaffolding, seating, staging and lighting can be placed on the firm, uniform surface that the mats provide, keeping your equipment high and dry. If you need parking areas or turnaround pads, DURA-BASE® allows your guests or VIPs to get as close to the venue as possible.

When the show's over, tear down is a cinch with DURA-BASE® mats. They can be rapidly removed or reconfigured to allow truck access to the location. Once you're off the location, you can be assured that no rutting or damage to the playing field has occurred.

DURA-BASE® mat system provides flexibility and mobility to your live event. For light duty walkways, vehicle routes and tent flooring, consider the nimble BRAVO® mat system for your event, as well.
